Sebastian Oviedo

Multimedia Engineer

Versatile Multimedia Engineer with expertise in intelligent automation, RPA, full-stack development, and chatbot integration. Skilled in designing and implementing AI-powered automation solutions, optimizing workflows, and collaborating with cross-functional teams to drive innovation. I quickly adapt to new technologies and evolving project requirements.

I have worked with a diverse technology stack, including UiPath, Power Platform, VB.NET, NodeJS, Python, JavaScript, SQL Server, GIT, and Azure, delivering scalable, AI-enhanced solutions that improve efficiency and decision-making.

EXPERIENCE

💼 CHAZEY PARTNERS

- **Intelligent Automation Solution Design Architect**
  Jan. 2024 - Present [Remote]

  Description: As an Intelligent Automation Solution Design Architect, I focus on creating scalable and efficient automation solutions that leverage AI and machine learning to optimize business processes. My role involves translating complex requirements into practical designs, ensuring seamless integration within enterprise ecosystems. By collaborating with cross-functional teams, I help drive innovation and guide development teams toward technical excellence.

  Key Responsibilities: Solution design and architecture, AI and machine learning integration, cross-functional team collaboration, leading proof of concept projects, mentoring development teams.

- **Intelligent Automation Developer**
  Jan. 2023 - Jan. 2024 [Remote]

  Description: As an Intelligent Automation Developer, I specialized in designing and optimizing automation workflows to improve efficiency and reduce manual effort. I focused on analyzing processes, enhancing RPA solutions, and ensuring seamless system functionality through rigorous testing and maintenance. My work contributed to more scalable and reliable automation systems that streamlined operations.

  Key Responsibilities: RPA workflow development, script optimization, process automation analysis, AI integration, solution testing, system maintenance.

💼 2NV SAS

- **Senior Engineer**
  Dec. 2021 - Jan. 2023 [Remote]

  Description: As a Senior Engineer, I played a key role in developing and optimizing automation projects, ensuring efficient system performance. I collaborated with stakeholders to align technical solutions with business needs and provided technical guidance to junior engineers, fostering team growth and problem-solving capabilities.

  Key Responsibilities: Automation project development, system troubleshooting and optimization, stakeholder collaboration, technical support for junior engineers.

- **Semi-Senior Engineer**
  Apr. 2020 - Dec. 2021 [Remote]

  Description: As a Semi-Senior Engineer, I supported the development of RPA solutions, chatbots, and web applications, contributing to automation and process improvements. I assisted in system optimization, troubleshooting, and integration efforts, ensuring efficient performance. Additionally, I collaborated with stakeholders to align technical solutions with business needs.

  Key Responsibilities: Web development and chatbot integration, automation project development, system troubleshooting and optimization, stakeholder collaboration, technical support.

- **RPA Developer At Ecopetrol**
  Jun. 2019 - Apr. 2020 [On-Site]

  Description: As an RPA Developer, I supported the development and maintenance of automation solutions, helping streamline processes and reduce manual effort. I assisted in analyzing automation opportunities, updating scripts, and troubleshooting issues. Additionally, I collaborated with business analysts to ensure smooth implementation of RPA workflows.

  Key Responsibilities: RPA solutions development, automation opportunity analysis, script maintenance and updates, collaboration with business analysts.
